

PeaceMaker™

All-Natural PeaceMaker™ is scientifically formulated to provide optimal support levels of magnesium, Vitamin B1, and inositol for deer to help maintain a normal and relaxed disposition.

Deficiencies in magnesium and Vitamin B1 have been shown to lead to irritable behavior.

Especially useful in bucks during rut, does at weaning, when transporting deer, and anytime when lower feed intakes may lead to deficiencies in these nutrients.

Delivers Optimum Levels Of Key Nutrients Designed To Help Maintain A Normal And Relaxed Disposition

⊕ **Magnesium**

- Magnesium is a key nutrient important for the release and uptake of serotonin by brain cells. Serotonin is an important neurotransmitter that acts in the central nervous system where it modulates anger, aggression, and mood.
- Added Magnesium can help maintain normal disposition and supports sound neuromuscular function.

⊕ **Vitamin B1 (Thiamine)**

- Vitamin B1 is a key nutrient essential for nerve stimulation and for metabolism of carbohydrates to fuel the brain and body with energy. Deficiency in Vitamin B1 can lead to mood disorders, irritability, anxiety, restlessness and panic disorder.
- Supplemental Vitamin B1 has been shown to help support normal mood and behavior.

⊕ **Inositol**

- Inositol plays a role in key chemical reactions in the brain related to mood regulation.
- Can aid in supporting normal fat transport and nerve transmission.
- Inositol supplementation has been shown to provide positive support during mild mood changes and occasional anxiety caused by stress.

⊕ **Contains no herbal ingredients nor tryptophan. Eliminates concerns of potential unwanted side effects.**

Feeding Instructions For Adult Deer:

Top dress or mix in feed at a rate of 1/2 ounce per day (1/2 scoop) for each deer.

Example: One scoop for every two (2) deer daily.
